Zombie attack roblox bosses

Community content is available under CC-BY-SA unless otherwise stated. Boss zombies are the strongest type of zombie. Every boss has a special ability that no other zombie uses. Bosses usually appear every 10 waves, each of which becomes more difficult than in the past. Please note that the boss's health depends on the number of players on the server. Damage from shots to the head does not cause much damage to the bosses. Santa Boss (Bombs White Stuff) Mega Tank: His health depends on how many players there are in the server, throws stones at random players, can make earthquakes (3 times or once, red and big wave, respectively), appears in Wave 11. King Slime: His health depends on how many players have on the server, throws green beams at players, can make earthquakes (once), and can make green beams that target all players currently alive in their current location (easy to dodge), appears in Wave 21. King Slim can also send up columns of slime around him, and columns deal about half of your hp. Dark Ghost: His health depends on how many players have on the server, throws red balls at players (similar to the green rays of King Slim), can make earthquakes, but the explosion comes from outside, and can become invisible for a certain amount of time, appears in Wave 31. Demon Overlord: His health depends on how many players are on the server, causing explosive zombies and demons (there is a chance for called zombies to be tanks), attacks come from the ground, so you need to keep moving, and can use an explosive attack shield if he is next to a player appearing in Wave 41. Dragon Beast: His health depends on how many players there are in the server, this boss can attack faster than other bosses, he can shoot lasers that can do a little damage, can use the breath of the dragon, which can slowly damage the players who got it, can also do the spin of the dragon, which is a cross explosion attack that can do more damage than a laser. These attacks from the element of the dragon in elementary wars (except the laser), appears in Wave 51 . Alien Leader : His health depends on how many players are on the server.
